

SAFETY AT WORK

Dust-proof green boxes

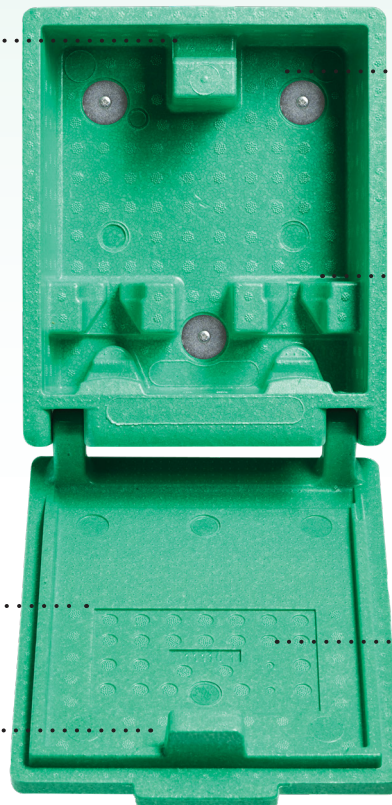

A closed station protects your first aid equipment from dirt and dust and keeps the products ready for use.

The soft close system makes it easy to open and close the box and protects it from dust and dirt from the surroundings

Made of polystyrene - a light, isolating and environmentally friendly material. It is produced with less plastic compared to a 100% plastic construction.

When replaced the box is suitable for burning

Easy to mount close to the working station

The moulded holders fit all our wound and eyewash bottles - both with regular and DUO eyecups - and keep them securely stored

Appointed "Worldstar Winner" for being an innovative product because the packaging is an integrated and permanent part of the product

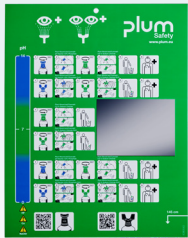

PRODUCT FACTS & BENEFITS

- Dust-tight wall stations in high-impact polystyrene
- Visible and readily available first aid
- Quick and efficient wound and eyewash
- Simple and quickly mounted on the wall close to the workplace
- May be mounted right where the need for immediate rinsing will be
- Supplied with clear pictograms and mirror
- Particularly suited for dusty and dirty production areas
